

From the Principal's Desk

A new academic year marks the beginning of a fresh journey filled with new opportunities, aspirations, and achievements. As we step into this new session, let us carry forward the lessons learned from the previous year and use them as stepping stones towards greater success.

Every new beginning gives us a chance to reflect, improve, and grow. Mistakes are not failures; they are valuable learning experiences that help us become wiser, stronger, and more determined. Let us embrace this year with a positive mindset, renewed enthusiasm, and a commitment to excellence.

My dear students, this academic year will bring countless opportunities for you to discover your hidden talents, sharpen your skills, and broaden your horizons. I encourage each one of you to participate actively in academics, sports, arts, leadership activities, and all the experiences our school has to offer. Believe in yourself, stay curious, and never stop learning.

Success is not measured only by marks but by the values we uphold, the efforts we make, and the character we build. Let us work together to create a culture of discipline, respect, innovation, and lifelong learning.

I wish all our students a year filled with growth, confidence, and remarkable achievements. May you continue to shine brighter with each passing day and make yourselves, your parents, and your school proud.

Wishing everyone a successful and inspiring academic year ahead.

Quote of the month

Creativity

“You can’t. The more you use, the more you have.”

The quote **“You can’t. The more you use, the more you have.”** is by Maya Angelou, and it highlights a powerful idea about how creativity works.

Creativity isn’t like a limited resource (like money or fuel) that runs out when you use it. Instead, it behaves more like a skill or a muscle. The more you practice thinking, imagining, drawing, writing, or creating, the stronger and more natural it becomes.

Activities

First Day Activities

A joyful beginning to the Montessori journey! Our little learners stepped into school with excitement and curiosity, making their first day a truly happy experience. They actively participated in a fun take-away activity, where they explored colours, shapes, and materials to create beautiful crafts with their tiny hands. This hands-on experience not only encouraged creativity and fine motor skills but also helped them feel comfortable and engaged in their new environment. With cheerful smiles and a sense of pride in their creations, the children carried home their first little masterpiece—making their first day of school special, meaningful, and full of lovely memories.”

World Art Day

On the occasion of the World Art Day Montessori learners engaged in a delightful **Thumb Print Activity**. The children used their thumbs to create colourful birds, exploring different colours and patterns with great excitement. This hands-on activity helped in developing their fine motor skills and hand eye coordination while encouraging creativity and self expression. It was a joyful experience as the little children proudly transformed simple thumb impressions into beautiful artwork.

World Earth Day

On the occasion of World Earth Day, a unique and engaging fork painting competition was organized for the students. The children participated with great enthusiasm, using forks as innovative tools to create vibrant and imaginative artworks inspired by nature and the beauty of our planet. This creative activity not only allowed them to explore a new artistic technique but also helped deepen their appreciation for the

Activities

environment. The event fostered creativity, curiosity, and active involvement among the students. Each participant put forth wonderful efforts, making the competition both enjoyable and meaningful for everyone involved.

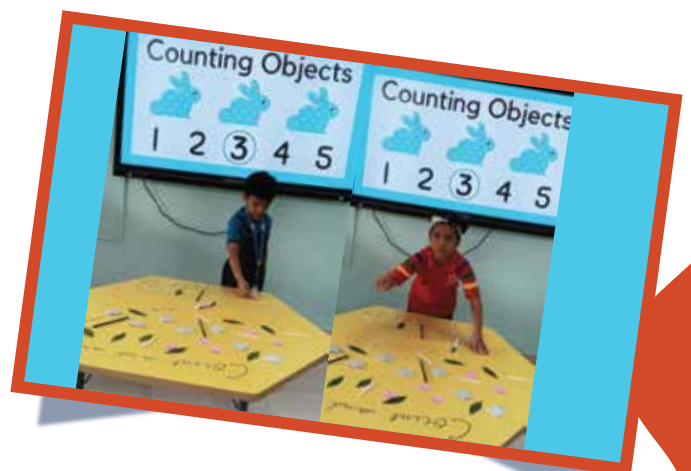

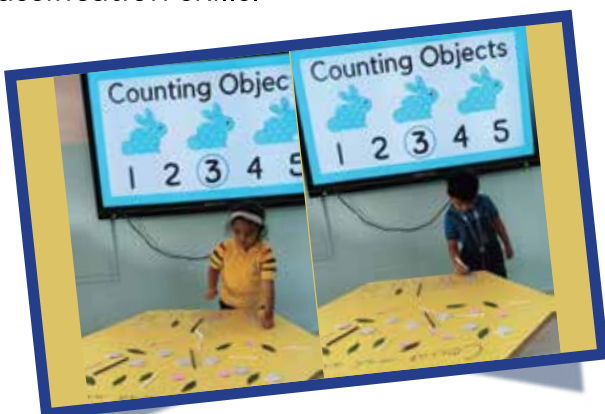

Subject Enrichment

English - Mont I: Children participated in Standing line formation activity using sticks. They carefully picked up and arranged the sticks in straight standing lines, helping them recognize the concept of standing lines through hands-on learning.

This activity helped them for pre-writing skills by strengthening the muscles needed for writing and tracing.

Maths - Big and Small - Mont II: Children used clay to make Big and Small balls. This activity helped them understand size concepts while improving fine motor skills, creativity and hand eye coordination.

Maths - Counting Objects - Mont III 'A': The activity was conducted where students observed a group of mixed objects (such as leaves, flowers, shapes, cutouts, pencil etc.) placed together. They identify each type of object, count them carefully and write the correct number. This helps them understand counting in real life context while improving observation and classification skills.

PARENT'S CORNER

"I am the mother of Riyansh Kumar, a student of Mont II 'A', and I would like to share my feedback about Ryan International School.

We chose this school mainly because it is close to our home, and we had also heard positive feedback about the school from one of our friends. After just one month of my son being part of the school, I am very happy with our decision.

The school has excellent infrastructure, a well-designed curriculum, and wonderful extracurricular activities that help children grow in all aspects. The classrooms are bright, colorful, and create a very positive learning environment for kids. Activities like art & craft, celebrations, and other engaging events make learning enjoyable for children.

In just one month, we have noticed a positive change in our son. His confidence has improved, and he has started speaking more in English. In fact, he now encourages us to speak with him in English at home as well, which makes us very happy and proud. It is wonderful to see his enthusiasm for learning and his excitement about going to school every day.

PARENT'S CORNER

A special thanks to Mittal Ma'am for her care, patience, and dedication towards the children. My son feels very comfortable with her, and it gives us confidence as parents to know that he is in such caring hands. We truly appreciate how she supports the children and keeps parents informed about activities and homework.

Overall, we are very satisfied with Ryan International School and truly appreciate the school for giving our child such a happy and positive start to his learning journey."
