

From the Principal's Desk

"Unity is strength... when there is teamwork and collaboration, wonderful things can be achieved."

- Mattie J. T. Stepanek

This month at Ryan International School, Kompally, our little ones experienced the true essence of unity through art and culture. Unity, our Value of the Month, was beautifully woven into every activity—whether it was celebrating **Doctors' Day**, where children together honored caregivers with craft and coloring, or during **Environment Week**, where teamwork in leaf art brought out creativity rooted in responsibility toward nature.

The **Glorious Green Day** highlighted unity in diversity as each grade embraced different green-themed activities yet celebrated the same spirit of learning and joy. The **Star of the Week** recognition ensured that every child had their moment to shine, reinforcing the message that while each star is unique, together they light up the sky.

Classroom themes like **Emotions, My Family, AP Word Family, and Sense Organs** gave children opportunities to express feelings, celebrate bonds, explore sounds, and understand their bodies—all nurturing holistic growth. In the **Innovation Lab**, young minds united art, science, and play through the **3D Water Ecosystem Models and Sail Boat Making**, blending curiosity with culture.

Unity is not just being together—it is growing together. This month's experiences remind us that when children unite their imagination with learning, they create a culture of joy, respect, and shared growth.

Quote of the month

***“ Unity turns individual passions
into collective harmony—together
we thrive in art, culture, sports,
and healthy living.”***

ACTIVITIES

Doctor's Day - Mont I

On National Doctors' Day, we were honored to welcome Dr. Sharvya, Consultant Anesthesiologist at Wellness Hospital, to Ryan International School, Kompally.

Dr. Sharvya addressed our students and shared valuable insights on the importance of good habits and personal hygiene in staying healthy. Her inspiring words left a lasting impression on young minds, encouraging them to be more mindful and responsible in their daily routines.

Students in Montessori I & II had a fun Colouring Activity. They coloured pictures of a doctor's kit and learned to identify tools like stethoscopes, thermometers, and bandages. This engaging task sparked their creativity and introduced them to basic healthcare concepts in an enjoyable way. Meanwhile, our little ones in Montessori III took it further with a Doctor's Kit Craft Activity. They used paper, glue, and various materials to create their own doctor's kits, complete with mini tools. This hands-on craft helped them develop fine motor skills and imaginative thinking while fostering an appreciation for doctors and caregivers. The Doctors' Day celebration was a meaningful experience for our young learners. It combined creativity with real-world learning and helped instil respect for medical professionals.

Winners:

Position	Grade	Student Names
I	Montessori I	Jeswika
II		Ayra
III		Advaitha
I	Montessori II	Varnika
II		Manvi
III		Jeevansh

Winners:

Position	Grade	Student Names
I	Mont III	Vedanshi
II		Aarna
III		Punarvi

Environment Week Celebration

As part of **Environment Week**, the little learners of Mont I, II & III went on a short nature walk around home to collect dry leaves. They then stuck the leaves on paper to create leaf art. Teachers guided the children in identifying shapes, colours, and textures of the leaves, turning it into a creative and educational experience.

Glorious Green Day

Our little ones at Ryan International School, Kompally celebrated Glorious Green Day with joy, creativity, and a splash of green.

Montessori I children enjoyed a vibrant caterpillar coloring activity, exploring different shades of green while building their fine motor and color recognition skills.

Montessori II participated in the “Color the Leaf Green” activity, learning to identify the color green while enhancing their focus and coordination.

Montessori III had fun with a crafty twist—“Peas in a Pod”. This hands-on activity encouraged creativity and tied beautifully into the green theme of the day.

It was a delightful celebration of nature and learning blended together.

ACTIVITIES

Star of the Week

We celebrate a different Star of the Week every week. This special recognition gives one child the opportunity to be in the spotlight, sharing about themselves and taking part in fun classroom activities. It's a joyful way to build confidence, encourage self-expression, and make each child feel valued and appreciated. The Star of the Week enjoys moments like leading the line, speaking in front of peers, and receiving lots of cheer from classmates. This weekly tradition continues to bring smiles and helps create a warm, encouraging classroom environment where every child gets their time to shine.

Star of the week for July month are

Mont I: Aadvik, Aarna, Aaradhya, Karthik

Mont II: Aira, Deeksha, Jeevansh, Manvi

Mont III: Aadvi, Aanvi, Aarna, Aarya

CLASSROOM ACTIVITY

Emotions - Mont II

This month, our Mont II learners explored the theme of emotions through fun and engaging activities. Children learned to identify and express different feelings such as happiness, sadness, anger, and surprise using art. They enjoyed making expressive faces with emoji mask, which helped them understand that it's okay to feel different emotions and share them with others. These activities encouraged empathy, self-awareness, and positive communication, building a strong foundation for their social and emotional development.

ACTIVITIES

My Family - Mont II

In Mont II, children celebrated the theme of 'My Family' with a creative and joyful activity. The little ones dipped their hands in green paint to make lovely handprints on paper, symbolizing love and togetherness. They then added their family photo in the center, turning it into a special keepsake that reflected their bond at home. This activity not only enhanced their fine motor skills but also helped them value the importance of family and the love and care they receive every day.

“AP” Family Word - Mont III

Mont III students had an exciting learning the “AP” word family through hands-on phonics activities. Using a special wooden word tool, children practiced blending sounds to form simple words like cap, map, nap, and tap. This interactive tool allowed them to slide and change letters, helping them understand how new words are formed by changing just one sound. The activity made learning fun and engaging, while also building early reading, pronunciation, and word recognition skills. It was a joyful and meaningful way to strengthen their phonics foundation through play-based learning.

Sense Organs - Mont III

Our Mont III students learned about the five sense organs through an interactive and creative activity. Each child was given a blank face outline and a set of cut-out sense organs—eyes, ears, nose, mouth, and hands. As they carefully stuck each organ in its correct place, they learned about its function and how we use it to see, hear, smell, taste, and touch. This hands-on activity helped reinforce the concept in a fun and memorable way, while also supporting fine motor skills and body awareness.

SCIENCE EXPERIENTIAL LEARNING

Water Ecosystem - 3D Printed Aquatic Animal Display - Mont III

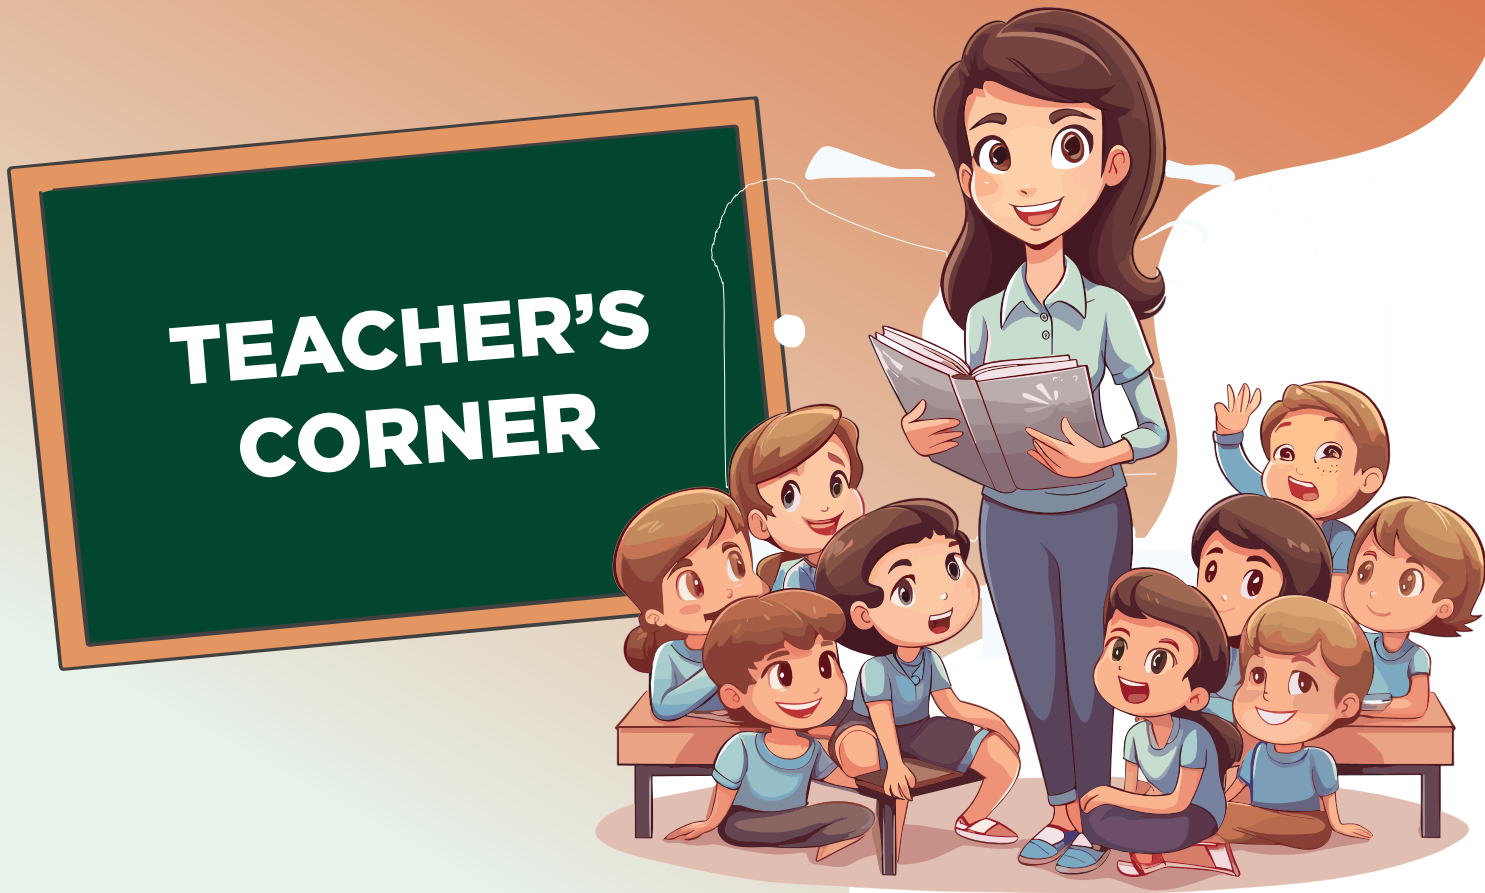

Our children of Mont III explored the components of a water ecosystem, including various aquatic animals, plants, and their interdependence. They observed and interacted with 3D printed models of water animals to understand their unique features, habitats, and roles in the ecosystem and enhanced environmental awareness, curiosity, and visual learning by engaging with physical representations of aquatic life. This activity strengthens observation and discussion skills by identifying and describing the functions of different organisms within the water ecosystem.

Introduction to Sail Boat Activity - Mont III

Our students of Mont III participated in an engaging hands-on activity to learn about sail boats. Using materials like EVA foam sheet (for the boat base), corrugated sheet (for the sail), and nuts and bolts (to fix the sail), children created their own floating sail boats. Through this activity, students were introduced to the concept of floating objects and movement in water. They enjoyed placing their sail boats in a water tub and watching them float. The session sparked their curiosity and helped develop fine motor skills, creativity, and early science awareness through play and observation.

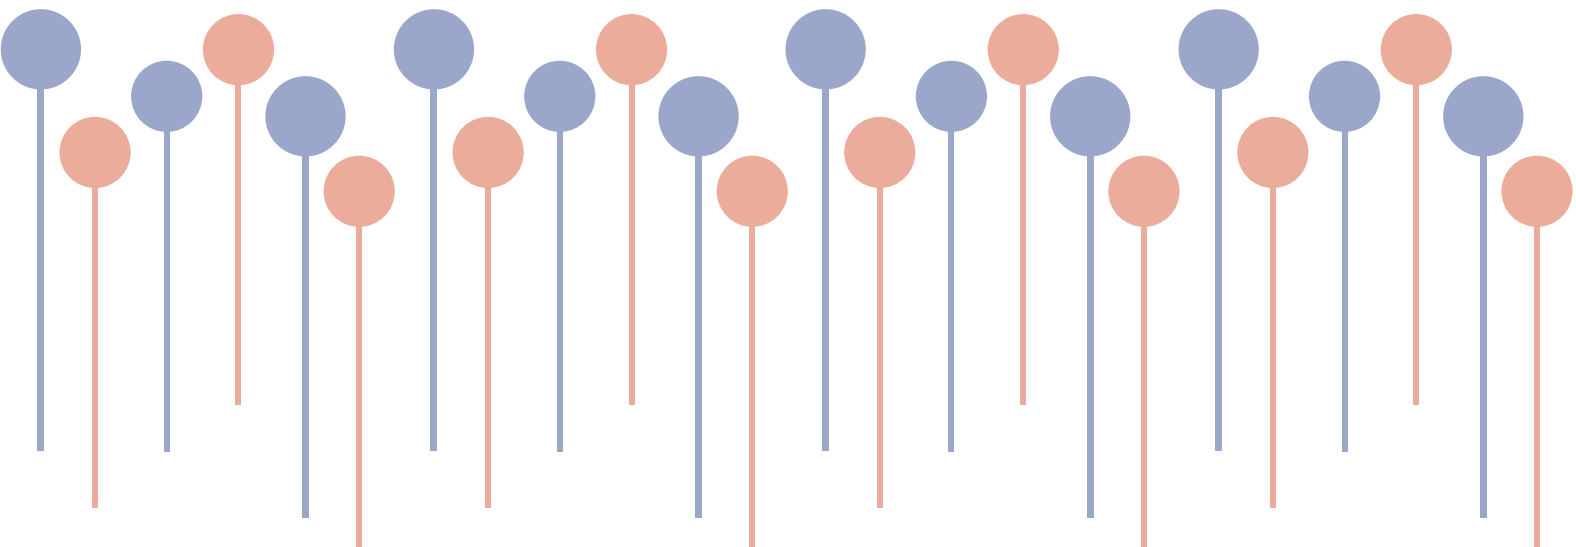

As teachers, we witnessed how little steps build big values. Through activities like the **Emoji Masks for Emotions and Handprint Family Art**, children discovered togetherness in self-expression. The joy in their eyes when they worked side by side during craft or group play reflected how art and culture are best nurtured in a collective spirit. Every smile and every creation reminded us that teaching is not just about academics—it's about shaping a family within the classroom..

- Mrs. Dhammani Padma,

Teacher - Mont II

PARENT'S CORNER

As parents, it fills our hearts with pride to see how the school beautifully blends **values with experiential learning**. The month of July was truly special. From celebrating **Doctors' Day**, which taught our children respect for caregivers, to the **Environment and Green Day activities**, which nurtured awareness about nature, every event carried meaning.

We especially loved the **Star of the Week initiative**, which gave each child confidence to stand tall. Classroom activities on **emotions, family bonding, and phonics** showed us how learning goes hand in hand with values. The **Innovation Lab sessions** were a wonderful surprise, sparking curiosity through hands-on science.

Unity, the value of the month, was evident everywhere—children learned that togetherness is joy, whether in the classroom, during celebrations, or while creating art. As parents, we are grateful to see them grow not just as learners but also as compassionate individuals who respect culture and community.

**- Mr. Tummala Sai Teja Reddy,
Parent of Tummala Aaradhya Reddy - Mont I**

STUDENT CORNER

“This month was so much fun! On **Doctors’ Day**, I made my own doctor’s kit and learned about stethoscopes. For **Green Day**, I coloured a caterpillar and made a pea pod. In my class, I loved making handprints with my family picture and a smiley face mask. The best part was when my sail boat floated in the water tub—I felt like a scientist! I also became Star of the Week once, and my friends clapped for me. It made me very happy.” – A Mont student.

- Tummala Aaradhya Reddy,
Mont I
