Determination

Determination is the quiet strength that helps us move forward when challenges seem difficult. It is the decision to keep trying, even when success does not come immediately. Talent may give us a beginning, but determination helps us reach our goals.

Every achievement is built on small steps, consistent effort, and the courage to overcome setbacks. A student who struggles with a subject but continues to learn, a sportsperson who practices after a defeat, or a young person who refuses to give up on a dream—all demonstrate the true meaning of determination.

As a school community, let us encourage our children to see failures not as the end, but as opportunities to learn and grow. Let us teach them that progress is more important than perfection and that perseverance eventually turns challenges into achievements.

Dear students, believe in yourself, stay focused on your goals, and never allow temporary difficulties to define your future. **When determination becomes our habit, obstacles become stepping stones to success.**

Let us move ahead with confidence, courage, and an unwavering determination to become the best versions of ourselves.

Quote of the month

“Success is the result of persistence, hard work, and the determination to never give up.”

ARTICLE FROM COORDINATOR'S DESK

Determination – The Little Steps That Lead to Big Achievements

Every day at Ryan International School, Kompally, I see our Montessori learners discovering, exploring and learning something new. In these early years, determination is not about achieving perfection; it is about having the courage to try, the patience to practise and the confidence to try again.

Whether it is completing a puzzle, learning to write a letter, building something with blocks, putting things back in order or learning to do a task independently, every small effort matters. When our little ones say, “I can try again,” they are developing a quality that will support them throughout their lives.

As educators and parents, our role is to create an environment where children feel safe to make mistakes, learn from them and keep going. Let us appreciate not just the outcome, but the effort, persistence and enthusiasm behind every attempt.

May our Montessori learners continue to approach every challenge with curious minds, confident hearts and determined spirits. Let us nurture the belief that every big achievement begins with one small, determined step.

ACADEMIC ACTIVITIES

Count and Match Activity

Learning is exciting when little hands and curious minds work together!

Today, our Montessori II children enjoyed a Count & Match activity, where they counted objects carefully and matched them with the correct numbers. This fun hands-on activity helped strengthen their counting, number recognition, focus, and confidence.

Every number is a new step in their learning journey!

Brushing Teeth Activity

Healthy habits begin early!

Today, our little learners enjoyed a fun Brushing Teeth Activity, where they learned the correct way to brush their teeth and why oral hygiene is so important. Through hands-on learning and interactive play, they discovered that brushing twice a day helps keep their teeth clean, strong, and bright.

It was wonderful to see their excitement as they practiced this important life skill with big smiles!

Trace and Breath Activity

Students of Mont III traced the fingers of one hand with the other while practicing slow breathing—breathing in as they traced up each finger and breathing out as they traced down. This activity helped students improve focus, mindfulness, emotional regulation, and relaxation while reducing stress.

ACADEMIC ACTIVITIES

Taking Care of Yourself (Getting Dressed)

Students of Mont III learned the steps of getting dressed independently by doing this activity. They practiced wearing a T-shirt and pants in the correct sequence, making the activity fun, engaging, and easy to remember.

Thank You Day Celebration

Mont III children celebrated Thank you day by giving thank you card to Ayya, Watchman, Teachers, Drivers, Electrician, Principal, Section head and they wished them thank you for there service.

INNOVATION

STEM Activity

Doll House Making Students designed and built a simple doll house using craft materials. They learned about basic construction, shapes, and arrangement while creating walls, doors, windows, and roofs. The activity encouraged creativity, imagination, design thinking, and fine motor skills through hands-on learning. Caption: Building a Creative Doll House! Students explored creativity, design, and construction through an engaging hands-on STEM activity.

Magnetic Car Making Students created a simple magnetic car and explored the basics of magnetism through a fun hands-on activity. They observed how magnets work and learned about magnetic force while assembling and testing their models. The activity developed curiosity, observation, and problem-solving skills. Caption: Exploring Magnetism with a Magnetic Car! Students discovered the exciting world of magnets through creative model making and hands-on exploration.

ACTIVITIES

Ryan Sir Birthday Celebrations

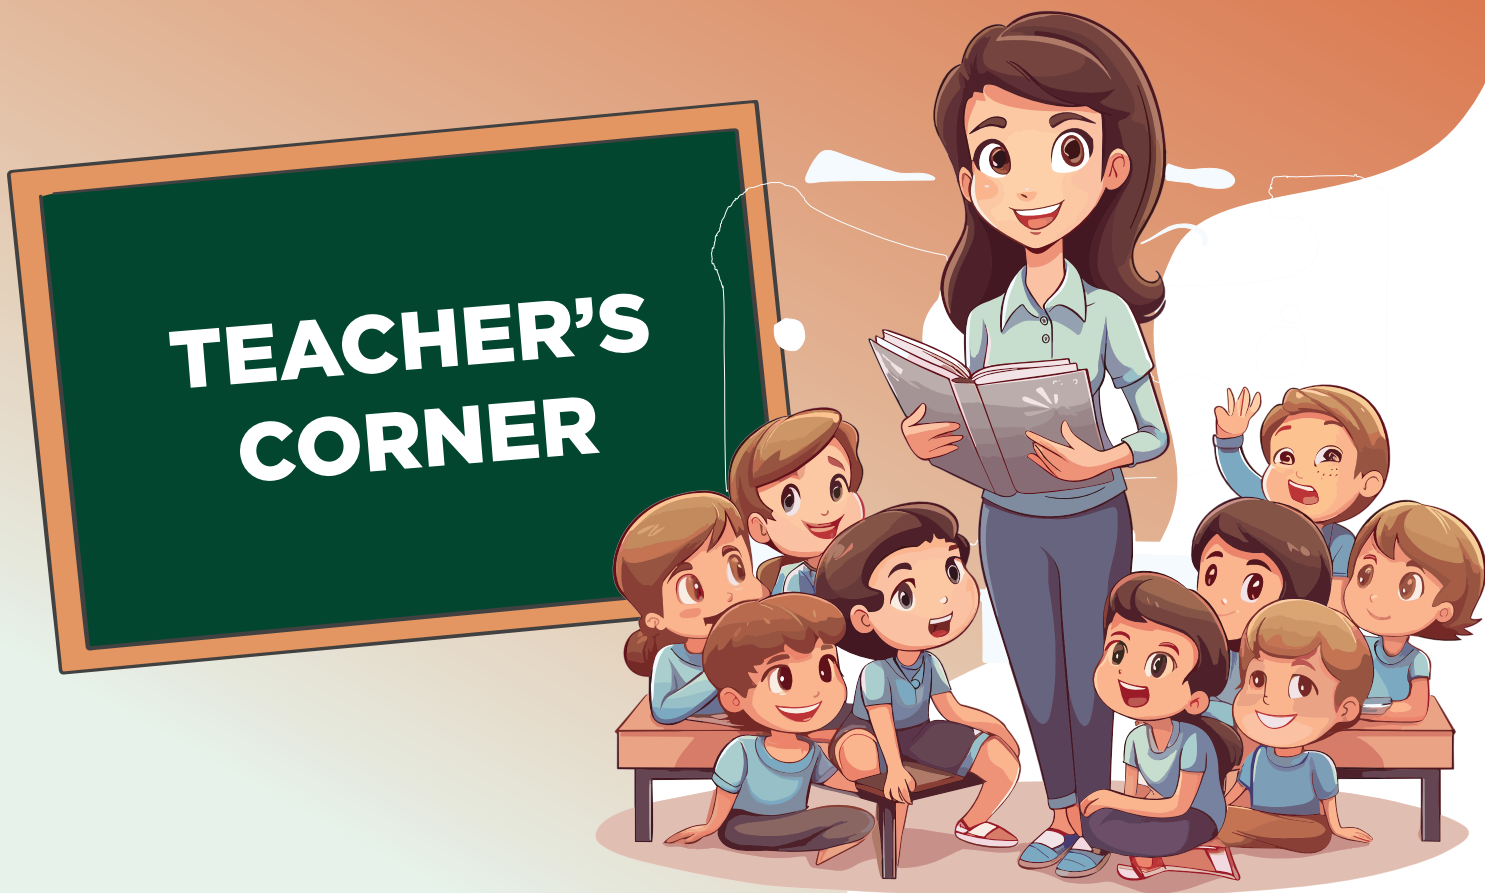

Sponge Dabbing Competition - '50 years of smiles with Ryan Schools' to celebrate the joyous occasion of the birthday of our beloved CEO, Mr. Ryan Pinto, Montessori students will engage in a delightful Sponge Dabbing Competition. Children will use bright colours and sponges to colour the number '50' alongside a beautiful celebratory caption. This hands-on activity encourages artistic self-expression while helping children explore textures, colours, and shapes in a fun, celebratory way.

Parents Day

Children enjoyed a delightful **Parent's Day Bookmark Making Activity**, creating beautiful bookmarks with colourful finger dabs.

With tiny fingers and vibrant colours, each child made a unique keepsake filled with love for their parents. This fun sensory activity encouraged creativity, improved fine motor skills, and strengthened the special bond between children and their families.

Every day in Mont II is filled with learning, laughter, creativity and little moments of discovery. Our young learners are enthusiastically exploring new concepts through stories, rhymes, activities, games and hands-on experiences.

It is wonderful to see our children becoming more confident, independent and expressive each day. We encourage them to learn through curiosity, kindness, sharing and teamwork.

As a teacher, it is a joy and privilege to watch these little minds grow, learn and shine. We look forward to creating many more happy learning experiences together!
